## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to **Group Art Unit 1648**.
2. Applicant's preliminary amendments filed August 22, 2001, February 11, 2002 and February 20, 2002 are acknowledged and entered. Claims 1-18 are pending.

### ***Election/Restrictions***

3. Restriction is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I claim(s) 1-8 and 11-16, drawn to a method for purifying a crude viral preparation containing viral particles of interest.
- Group II claim(s) 9, 10, 17 and 18, drawn to a protocol for producing viral particles.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature. The claimed special technical feature is a method of purifying a crude viral preparation containing viral particles of interest comprising at least one fluidized-bed adsorption step. The prior art teaches this method as evidenced by Shabram *et al* (WO 96/27677). Shabram discloses a method for purifying viral particles from a cell lysate comprising two

Art Unit: 1648

chromatography steps (fluidized-bed adsorption), see abstract. Therefore, Applicant's method as claimed fails to contribute over the prior art and is not a special technical feature.

Groups I and II are drawn to methods; the methods are related by a purification step. However, Group II is drawn to a method involving the culture and transfection of cells to produce the particles to be purified. These methods have different method steps and materials. Because these inventions are distinct for the reasons given above and the literature search required for Group I is not co-extensive for Group II, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
